

Customization Suite

Key Benefits

- Customize Maximizer CRM to model proven best practices for your industry
- Adapt fields, screens and actions so they are specific to your business
- Easily integrate to leverage information from other front and back-end systems

Customize CRM to Support & Accelerate Your Business.

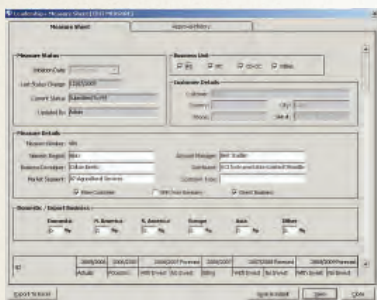

Maximizer CRM supports customization at every level, to deliver the specific user interface and information required by your organization to streamline processes and effectively leverage the skills of your staff. The Customization Suite provides the flexibility you need to alter the software and interface to mirror your business processes as they evolve.

Using familiar programming languages and industry standards to integrate with your front- and back-office applications, IT professionals, Maximizer Software's experts and Certified Solution Providers can easily tailor Maximizer CRM to suit your requirements.

Designed from the ground up for customization

Through an easy-to-use interface, developers and IT professionals have everything they need to integrate, customize and extend the power of Maximizer CRM.

- Maximizer Web Service allows the easier exchange of information with Maximizer CRM over HTTP for standardized, faster integration with other web-ready applications.
- With access to the meta data layer through an easy-to-use customization utility interface, create alternate captions for field labels on dialogs, windows and menus to tailor these to your industry.
- Code examples in VB.NET and C# for creating custom program behaviors, windows and alerts, and integrating Maximizer CRM with other applications.
- Create custom windows and tabs and implement them for both the Windows desktop client and Web Access.
- Enable integration and customized windows to work for both desktop and disconnected remote users with automatic third-party data synchronization.
- Connect to address book, calendar, customer service, notes, opportunities, phone and user-defined fields.
- Access detailed documentation including Maximizer CRM data and table structures.

Customize your Processes: This example showcases the customization suite's capabilities to create a unique screen for the financial services industry.

“We wanted a system that was intuitive and as easy to use as possible. Maximizer CRM appealed to us because we could easily customize an array of screens. We like it because we can modify it down the road as our team becomes more confident with the system. This bottom up design is essential to the success of our CRM roll out because it gets the users involved in future customizations.”

Jack Guidry, VP & National Sales Manager,
W&O Supply

Model business best practices

Increase productivity by giving staff a centralized view of information from across multiple applications. Create additional windows from accounting or other applications to answer customer inquiries, issues and concerns immediately — without having to switch applications or check with other departments.

- Customize Partner and Customer Web Access to fit your business.
- Customize menu items, toolbar and window captions to personalize process interfaces.
- Add custom tabs and action menu items to the existing address book, opportunities, service cases and marketing campaigns.
- Give each department the flexibility to gather critical data with wizards to create custom fields and unique data entry forms.
- Set up customized actions and notifications to staff and partners for email updates on case status.

Integrate with other front and back-office applications

- Connect Maximizer CRM with other systems such as inventory management or ERP programs.
- Take advantage of the Accounting API programming interface to integrate with accounting programs. Create an additional window for customer-facing staff to see the financial details of customer accounts, including past estimates & invoices, credit balance and limit.
- Transfer data seamlessly between applications using XML.
- Synchronize data from other applications into Maximizer CRM in real-time or at regularly scheduled intervals, such as nightly or weekly.
- Schedule triggered data transfers to monitor applications for critical activities such as processed orders or late shipments.

Extend the functionality of Maximizer CRM with third-party add-on products already available from MaxApp Partners, including:

- Applications for specific industries
- Data management
- Document management
- Reporting
- Quoting
- Shipping
- Address verification
- Mobile applications
