License Agreement

Please read this legal agreement between you and Multiactive Software Inc. ("Multiactive"). The enclosed Multiactive software programs (the "SOFTWARE") are licensed to you by Multiactive for use only in accordance with this license agreement. If you do not agree to its terms, do not install the SOFTWARE and return it for a credit.

GRANT OF LICENSE

Multiactive grants to you the limited right to use one copy of the enclosed SOFTWARE, including all data files incorporated in the SOFTWARE, on a single computer processing unit or on a single terminal or computer connected to a network server, for the purpose of creating and maintaining one Web Site for publication on the Internet, (the "Web Site"), for a single person or company. If you intend to create more than one Web Site for the same person or company, or to create Web Sites for more than one person or company, you must acquire a separate license for each Web Site you create.

You are responsible for obtaining the appropriate hardware, software, and Internet access required to use the SOFTWARE, as described in the SOFTWARE User's Guide.

TITLE AND COPYRIGHT

All rights title and interest in the SOFTWARE are owned by and shall remain in Multiactive. You will not do anything to contest or prejudice Multiactive's title to the intellectual property rights in the SOFTWARE. Multiactive authorizes you to make only one copy of the SOFTWARE for processing purposes, and one copy for backup and archiving, provided that you reproduce all copyright notices and proprietary legends. You do not have the right to give a copy of the SOFTWARE to another person, electronically or by any other means.

OTHER RESTRICTIONS

You may not rent, lease, reverse engineer, decompile, disassemble, translate, merge, or create derivative works from the SOFTWARE.

ACCOUNTABILITY AND LIABILITY

You are responsible for everything contained on the Web Site including without limitation any information, advertisements and any other material you or a third party posts to it (the "Postings"), and all products and services offered through your Web Site. Multiactive will not be liable for the contents of the Postings or your products and services.

ORDER/INQUIRY PROCESSING AND INDEXING FUNCTION

The SOFTWARE provides you a means to create a Web site whereby shoppers on the Internet, ("Shoppers"), can find and contact you. The SOFTWARE also will allow orders and inquiries from such Shoppers relating to your products or services advertised on your Web Site to be processed, by Multiactive EC Services Inc., ("Multiactive EC"), provided that you have not modified the order/inquiry processing programming scripts in the SOFTWARE. Multiactive EC's services consist of accepting orders and inquiries from each Shopper, forwarding them to you in the form of an encrypted e-mail attachment by electronic mail and sending confirmation back to the Shopper, (the "Order Processing Function"). Multiactive and Multiactive EC are not responsible in any way for the fulfilling of Shoppers' orders or otherwise responding to Shoppers' inquiries. Multiactive EC reserves the right to charge you for the Order Processing Function. Multiactive and Multiactive EC do not guarantee the reliability, accuracy or timeliness of the Order Processing Function, nor the level of security provided by the encryption method used. Multiactive EC may discontinue the Order Processing Function at any time, upon providing you with at least 10 days notice and instructions or a software patch so that you can receive orders and inquiries directly from Shoppers.

Any business relationship or transaction between Shoppers and you is subject to the terms and conditions negotiated between the Shopper and you, and Multiactive and Multiactive EC shall not have any liability or responsibility with respect to such business relationship or transaction.

Multiactive EC's services also include indexing and storing information about your Web Site on a Multiactive EC Web site known as ecPlace. Multiactive EC reserves the right to terminate your listing on, or remove your content from, ecPlace if your Web site or its content are considered unfit for any reason by Multiactive EC or are the subject of a dispute with third parties.

INDEMNITY

You agree to indemnify and hold harmless Multiactive, Multiactive EC, and their respective employees, directors, and representatives from and against any loss, liability, claim, damage

and expenses (including attorneys' fees) arising from or in connection with the Postings, your products and services, or any use of the SOFTWARE or Order Processing Function made by you, Shoppers or other third parties.

WARRANTIES

Multiactive warrants that the media on which the SOFTWARE is supplied is free of defects in materials and workmanship, and will provide to you at no charge, within 90 days of purchase, a replacement copy of the SOFTWARE upon return of any defective media.

THE WARRANTIES CONTAINED IN THIS AGREEMENT ARE IN LIEU OF ALL OTHER REPRESENTATIONS, WARRANTIES AND CONDITIONS EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO IMPLIED REPRESENTATIONS, WARRANTIES AND CONDITIONS OF MERCHANTABILITY, AND FITNESS FOR A PARTICULAR PURPOSE, WHETHER ARISING BY STATUTE OR OTHERWISE IN LAW OR FROM A COURSE OF DEALING OR USAGE OF TRADE.

MULTIACTIVE AND MULTIACTIVE EC DO NOT REPRESENT OR WARRANT THAT:

(i) THE OPERATION OF THE SOFTWARE OR THE PERFORMANCE OF THE ORDER PROCESSING FUNCTION WILL BE ERROR FREE, UNINTERRUPTED OR THAT THE RESULTS OBTAINED FROM THEIR USE WILL BE ACCURATE OR MEET ALL YOUR SPECIFIC REQUIREMENTS; OR

(ii) ALL PROGRAMMING ERRORS CAN BE CORRECTED OR FOUND IN ORDER TO BE CORRECTED.

This limited warranty gives you specific legal rights, and you may have other rights, which vary according to local laws. Because some states and provinces do not allow the exclusion or limitation of implied warranties, the above warranty exclusions or limitations may not apply to you.

DISCLAIMERS

IN NO EVENT SHALL MULTIACTIVE, MULTIACTIVE EC OR THEIR RESPECTIVE DIRECTORS, EMPLOYEES, OR REPRESENTATIVES BE LIABLE FOR ANY LOST REVENUES OR PROFITS, BUSINESS INTERRUPTION, LOSS OF INFORMATION, OR ANY OTHER INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY KIND ARISING OUT OF THE USE OF OR INABILITY TO USE THE SOFTWARE OR THE ORDER PROCESSING FUNCTION, EVEN IF MULTIACTIVE OR MULTIACTIVE EC HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. Because some states and provinces do not allow the exclusion or limitation of liability for consequential or incidental damages, the above exclusions or limitations may not apply to you.

THE LIMITATIONS, EXCLUSIONS AND DISCLAIMERS IN THIS AGREEMENT SHALL APPLY IRRESPECTIVE OF THE NATURE OF THE CAUSE OF ACTION OR DEMAND, INCLUDING BUT NOT LIMITED TO BREACH OF CONTRACT, NEGLIGENCE, TORT OR ANY OTHER LEGAL THEORY, AND SHALL SURVIVE ANY FUNDAMENTAL BREACH OR BREACHES AND/OR FAILURE OF THE ESSENTIAL PURPOSE OF THIS AGREEMENT, OR OF ANY REMEDY CONTAINED IN THIS AGREEMENT.

IN NO EVENT SHALL MULTIACTIVE'S OR MULTIACTIVE EC'S LIABILITY TO YOU IN CONNECTION WITH THE SOFTWARE OR THE ORDER PROCESSING FUNCTION EXCEED THE FEES PAID BY YOU FOR THE SOFTWARE AND THE ORDER PROCESSING FUNCTION OVER THE PRIOR 120 DAYS.

GOVERNING LAW. This Agreement shall be governed by the laws of the Province of British Columbia, Canada, and the parties hereby exclude the applicability of the U.N. Convention on Contracts for the International Sale of Goods,.

U.S. GOVERNMENT RESTRICTED RIGHTS

The SOFTWARE is provided with RESTRICTED RIGHTS. Use, duplication, or disclosure by the Government is subject to restrictions as set forth in subparagraph (c)(1)(ii) of the Rights in Technical Data and Computer Software clause at DFARS 252.227-7013 or subparagraph (c)(1) and (2) of the Commercial Computer Software - Restricted Rights at 48 CFR 52.227-19, as applicable. Contractor/manufacturer is Multiactive EC Technologies Incorporated, 1066 West Hastings Street, 3rd Floor, Vancouver, B.C. V6E 3X1.

CHAPTER 1 INTRODUCTION

i *In order to enable SSL-secured transactions, you must obtain and install a digital certificate on your IIS server. See the ecBuilder Pro User's Guide for more on digital certificates.*

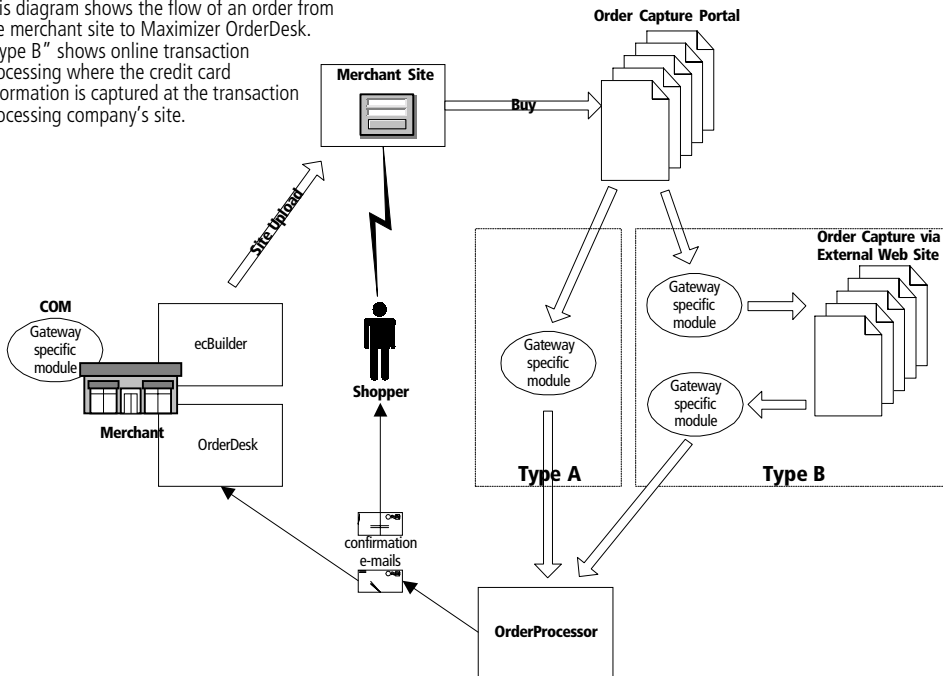

ecBuilder provides support for payment processing through plug-in extensions known as payment gateway modules (PGMs). PGMs encapsulate the interface to a third-party payment processor, and allow the ecBuilder-generated sites to forward merchant-authentication information from a transaction gateway to the respective payment processor.

The merchant authentication information is secured via public-key technology and embedded within the HTML pages generated by ecBuilder. At the time of purchase, the ecBuilder shopping cart forwards the encrypted processing information through a payment gateway module, where it is decrypted and used in conjunction with an SSL-secured order form to then log in to the payment processor and facilitate the credit card authorization process.

The transaction result—whether it is a pre-authorization, a capture, or a refund—is then returned by the processor and forwarded back to ecBuilder, which in turn sends the order information to the merchant as an encrypted e-mail attachment.

In addition to allowing merchants to view the order information received, Maximizer OrderDesk can provide an interface to the payment processor which will enable merchants to submit capture and refund requests to the payment processor post-fulfillment. Maximizer OrderDesk can also operate as a “point-of-sale” terminal for merchants, allowing them to perform authorization requests directly to their third party payment processing company right from their own computer. Both of these features are dependent upon which third-party payment processor you choose.

This diagram shows the flow of an order from the merchant site to Maximizer OrderDesk. "Type B" shows online transaction processing where the credit card information is captured at the transaction processing company's site.

There are several third-party transaction gateway providers directly supported by ecBuilder.

Note

In order to take advantage of the online credit card processing capabilities provided by a payment processing gateway, you must set up a merchant account with one of the transaction processing companies.

How to Apply for an Account

i Rather than following these steps, you may also obtain a merchant account by going directly to the PSiGate site at <http://www.psigate.com>.

Applying for a PSiGate is an easy process that you can start in ecBuilder. The PSiGate Web site lets you apply for a merchant account in four steps:

- Choose the currency you wish to settle in (Canadian, US, or both).
- Choose the credit cards you wish to accept.
- Enter your billing information.
- Download, sign, and return the contracts.

For more information, contact PSiGate customer support.

➤ **To apply for a PSiGate merchant account**

1. In ecBuilder, go to the Online Processing screen.
2. Click the Add button. The Merchant Gateway Profile dialog box appears.
3. Select PSiGate from the drop-down list and click the “Acquire merchant account...” button. ecBuilder opens the PSiGate application Web page.
4. Follow the instructions on the screen to complete the application.

Upon approval of your merchant account application, PSiGate provides you with the information you need to configure ecBuilder to work with your PSiGate account:

- **User ID** – this is used to access your account information at the PSiGate Web site.
- **Password** – the password is used in conjunction with your user ID at the PSiGate Web site.
- **Store name** – enter this information in the “Store Name” field when you set up ecBuilder.
- **Secure host name (and port number)** – enter the host name (not including the “https://”) in the “Host” field. Enter the port number in the “Port” field.
- **Digital certificate** – go to this URL to download your digital certificate to a safe location on your computer. In ecBuilder, enter the path to the downloaded file in the “Key File Full Path” field.
- **Additional instructions** - read and follow any additional instructions provided to you by PSiGate.

Note

You enter the above information in ecBuilder when you add a new Merchant Gateway Profile in the Online Processing screen. See “Set Up a Merchant Account Profile” on page 3. Press F1 for additional help.

Set Up a Merchant Account Profile

 Before you can enable online transaction processing in ecBuilder, you must have a merchant account with a credit card company or your bank and a transaction processing company.

If you have a merchant account with a credit card company or your bank, you may wish to set up online transaction processing. Once this is set up, credit card transactions are processed from your Web site and are tracked and maintained through Maximizer OrderDesk. You set up online payment processing in ecBuilder’s Transaction

Processing screen by creating a Merchant Account Profile for each account you have with a payment processing company.

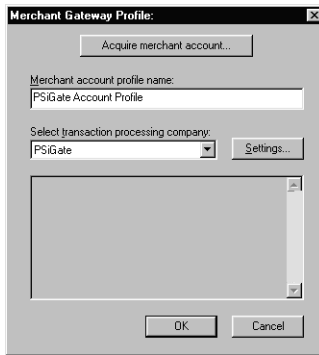

The method and procedures for online transaction processing will vary depending on the transaction processing company. PSiGate allows you to pre-authorize funds, process transactions after the product has shipped, and issue refunds.

➤ **To create a new Merchant Account Profile**

1. In ecBuilder, select Go > Online Processing to change to the Online Processing screen.

The Online Processing screen lets you select the merchant account that you wish to use for your ecBuilder catalog, or add a new profile for a merchant account.

2. Click the Add button to open the Merchant Gateway Profile dialog box.

3. Under "Merchant account profile name", type a short, descriptive name for the profile.
4. From the drop-down list, select the PSiGate transaction processing company. Note that you must have a merchant account set up with E-xact to proceed.

5. From the Merchant Gateway Profile dialog box, click Settings. ecBuilder prompts you to enter the settings for the merchant account.

A screenshot of the 'PSiGate Settings' dialog box. The dialog has a title bar with 'PSiGate Settings' and a close button. It contains several input fields: 'Store Name' (empty), 'Key File Full Path' (empty) with a 'Browse...' button to its right, 'Host' (pre-filled with 'secure.psigate.com'), and 'Port' (pre-filled with '1139'). Below these are two checkboxes: 'Preauthorize Payments' (unchecked) and 'Test Store' (unchecked). At the bottom are 'OK' and 'Cancel' buttons.

6. Enter the settings for your merchant account and click OK. If you need help with any of these settings, **press F1 in the Settings dialog box** or see the documentation provided to you by PSiGate.
7. Once the settings are entered, click OK in the Merchant Gateway Profile dialog box to finish creating the new profile. The new profile is now selected in the Transaction Processing screen. You also use this profile in Maximizer OrderDesk.

**Note**

You are not limited to the number of profiles or merchant accounts you can use with ecBuilder. The process of setting up different profiles allows you to switch your profile selection in both ecBuilder and Maximizer OrderDesk.

CHAPTER 2 USING PSIGATE

PSiGate allows for the pre-authorization, capture, and refund of funds to and from the consumer's credit card. Depending on the settings you enter in ecBuilder for your PSiGate merchant account profile, the orders you receive in Maximizer OrderDesk from your online catalog may also contain credit card pre-authorization information. The consumer's e-mail message will contain confirmation information from the merchant indicating the order has been received.

In addition to allowing you to view the order information, Maximizer OrderDesk provides a direct interface to the PSiGate payment processing server which enables the merchants to directly submit, capture, and refund requests to the PSiGate Processing server after the order has arrived in Maximizer OrderDesk.

If you would like to use PSiGate as a payment gateway for online credit processing, you must set up a merchant account with PSiGate. For more information, visit <http://www.PSiGate.com> to learn more about how their system works.

PSiGate from the Customer's Point of View

If you set up your online catalog to use PSiGate for credit card transaction processing, the result is a seamless integration of the credit card transaction into the visitor's Web experience. At the time that the visitor places an order, ecBuilder collects the visitor's credit card information after the visitor enters his or her name and address.

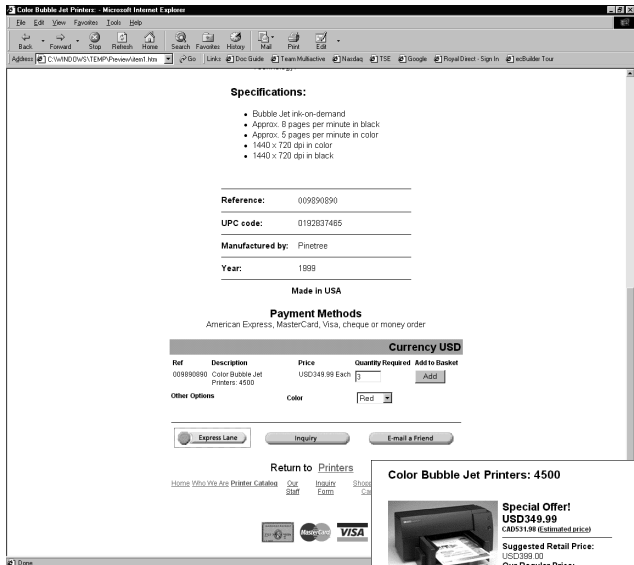

ecBuilder processes the order "behind the scenes". The order arrives as an encrypted e-mail attachment that, when opened, is

automatically imported to Maximizer OrderDesk and marked with the status of the credit card transaction—Payment Received, Payment Declined, Payment Preauthorized, and so on.

The Visitor's Point of View

If you use PSiGate for processing credit card transactions, here's what a typical shopper will experience:

1. The shopper examines the online catalog, reads the description of a product and decides to buy it, choosing quantity and options, and then clicking Add.

Color Bubble Jet Printers: 4500

Special Offer!
USD 149.99
each (excludes price)

Suggested Retail Price:
 USD 199.00

Our Regular Price:
 USD 99.99

Also Available in White

Pinetree's wide array of color Bubble Jet printers provide photo-realistic printing at an affordable price. Pinetree offers a printing solution for many types of customers including budget-minded users as well as the more experienced professional.

Features:

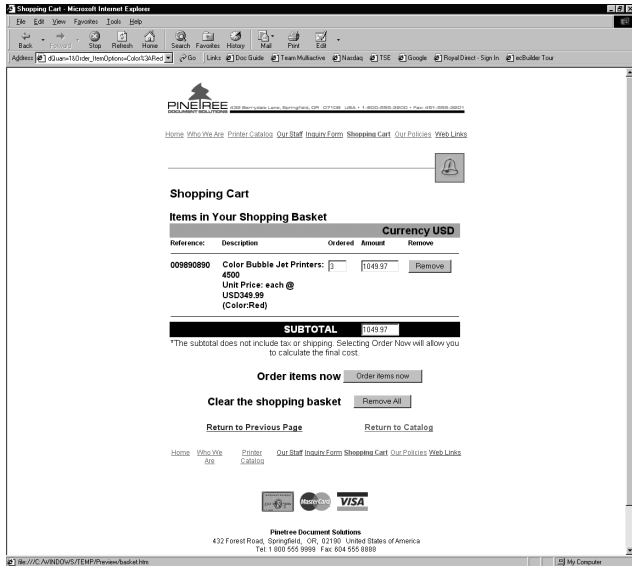

- The PT 4500 features an expanded print nozzle system that prints an area up to twice as large in just a single pass - resulting in blazing print speeds.
- The PT 4500 is the next generation of state-of-the-art Pinetree printers. It contains the exclusive Drop Modulation Technology.

Specifications:

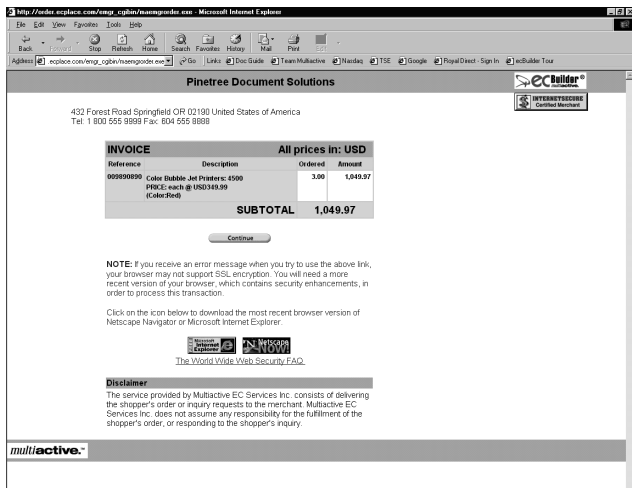

- Bubble Jet ink-on-demand
- Approx. 8 pages per minute in black
- Approx. 5 pages per minute in color
- 1440 x 720 dpi in color
- 1440 x 720 dpi in black

NOTE: The shopper has the option on this page of clicking the Express Lane button, which skips the Shopping Cart (step 2) and goes directly to the invoice page (step 3).

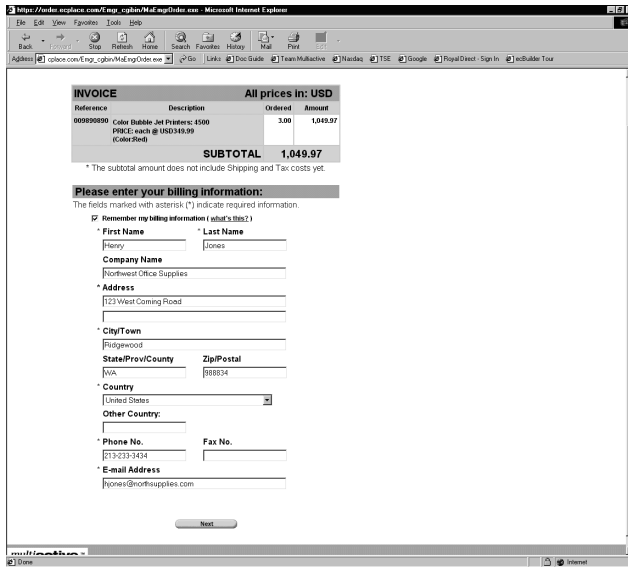

- On the Shopping Cart page the shopper reviews the order, including price and quantity, and then clicks "Order Items Now".

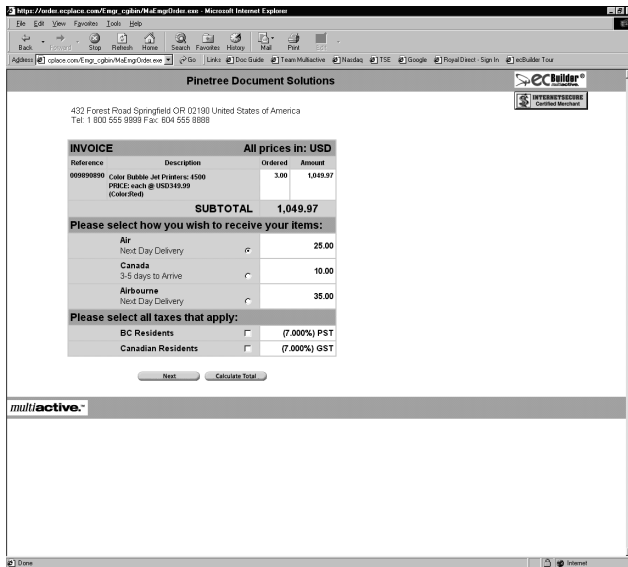

- The shopper then sees a summary of the invoice, reviews it, and clicks Continue.

- The ecBuilder order page redisplay the invoice and collects the shopper's name and address. If the visitor is a returning customer, the address information is displayed automatically. The shopper clicks Next.

- The shopper selects a method of delivery and any applicable taxes, then clicks Next.

- Invoice and address information are displayed. Near the bottom of the page, the shopper can choose to pay by credit card or another method.

The screenshot shows a Microsoft Internet Explorer browser window displaying an invoice and a payment options form. The invoice is titled 'All prices in: USD' and lists a single item: 'Color Bubble Jet Printer: 4500'. The subtotal is 1,049.97, and the total including shipping and taxes is 1,074.97. The shipping and delivery section shows 'Air Next Day Delivery' for 25.00. The taxes section shows PST (7.000%) and GST (7.000%) for 0.00 each. The billing to section shows the name 'Henry Jones' and company 'Northwest Office Supplies'. The shipping/delivery information section has a checkbox for 'Same as Billing contact' and fields for first and last name, company name, and address. The payment options section has two radio buttons: 'Credit Card' and 'cheque or money order'. The 'Credit Card' option is selected. Below the payment options, there is a section for 'Please complete the following:' with three questions: 'How did you hear about our site?', 'Did you find what you were looking for?', and 'Would you like us to contact you?'. There is also an 'Additional information:' section with a text area and 'Next' and 'Cancel My Order' buttons.

Reference	Description	Ordered	Amount
00000000	Color Bubble Jet Printer: 4500 P/E: each @ USD349.99 (ColorJet)	3.00	1,049.97
SUBTOTAL			1,049.97

Credit Card
 Selecting this option will require you to enter your credit card information on a subsequent page.

cheque or money order
 Please enter Payment Detail (cheque or money order):
 With this payment option, your order will be processed after submitting this page. There will be NO further request for confirmation.

Please complete the following:

The fields marked with asterisks (*) indicate required information.

* How did you hear about our site?
 from a friend

* Did you find what you were looking for?
 yes

* Would you like us to contact you?
 please!

Additional information:

Please supply additional information for your order (maximum 600 characters)

Next Cancel My Order

- If paying by credit card, the shopper enters the credit card information and clicks Submit.

- A thank you page notifies the shopper that the transaction is complete and displays the details of the order, including an order number that will be sent by e-mail.

Behind the Scenes

i The e-mail address you enter in the Site Builder Profile screen appears in the Contact Person Profile screen as the "Contact's E-mail Address". If you'd like this address changed, do so in the Site Builder Profile screen.

Behind the scenes, the ecBuilder order page sends the visitor's credit card information to PSiGate, which responds by sending the transaction record back to the server. The order and the results of the credit card transaction are automatically sent to you (the merchant) as an encrypted e-mail attachment, which you open to bring the information into Maximizer OrderDesk. As well, the ecBuilder order page generates a notification e-mail. Both of these e-mails are sent to the e-mail address you enter in the Site Builder Profile screen of ecBuilder. You can also specify to have orders and inquiries sent to three additional e-mail addresses in the Contact Person Profile screen.

Note

If you are using multiple e-mail addresses (entered in the Contact Person Profile screen) for e-mail notification of orders and inquiries, make sure you install the same digital certificate that you use to publish your site on each computer receiving notification. For more information, please refer to the section on "Importing and Exporting Digital Certificates" in the *ecBuilder Pro User's Guide*.

Using Maximizer OrderDesk to Process PSiGate Transactions

If you're using PSiGate as an online transaction processing gateway, you can process credit card transactions online using Maximizer OrderDesk. You can use Maximizer OrderDesk to perform one of four types of transactions: Sale, PreAuthorize Purchase, PostAuthorize Purchase, or Credit. Essentially, this allows you to complete sales transactions, preauthorize funds, complete a preauthorized purchases, and issue refunds to customers.

i One of the options when you set up your PSiGate merchant account profile in ecBuilder is the "Pre-authorize Payments" option. With this option selected, ecBuilder uses PSiGate to pre-authorize the purchase only—no funds are transferred. In this situation, you use Maximizer OrderDesk to "Complete Pre-authorize Purchase".

➤ To process a credit card transaction in Maximizer OrderDesk

1. Open Maximizer OrderDesk.
2. Locate and double-click the order to open the Order dialog box.
3. Under "Gateway Profile", select the merchant account profile for PSiGate and click the Process Transaction button.

- In the Process PSiGate Transaction dialog box, select the type of transaction you wish to perform: Sale, PreAuthorize Purchase, PostAuthorize Purchase, or Credit.

i If any information is incorrect in the Process PSiGate Transaction dialog box, simply click Close to return to the Order dialog box and make the necessary changes.

- Verify the credit card information and the transaction amount.
- If the information displayed is correct, click the Submit button to submit the information to PSiGate for processing. Maximizer OrderDesk displays a message indicating the result of the transaction.

PSiGate Features

PSiGate provides packaged solutions so you can get your Internet business up quickly-without time-consuming and expensive systems integration services.

PSiGate Payment

The PSiGate Payment module communicates with major Canadian and U.S. card processors to authorize credit card transactions in real time, reducing the cost of doing business over the Internet. Funds can be deposited into any Canadian bank or any of over 300 US banks in either Canadian or U.S. dollars. Customers receive real-time purchase confirmation, eliminating the impulse to call the merchant's help desk to verify that the transaction was successful. SSL transaction protocol sends transactions over a dedicated lease line directly into the banking systems data infrastructure. PSiGate is a multi-threaded application that allows multiple transactions to be processed concurrently on one server. This ensures that customers won't have to "wait in line" to get their transactions processed by a merchant.

PSiGate Fraud Protection

In addition to fraud checks provided by the card processor, the PSiGate Fraud Protection module provides extensive automatic checks that substantially reduce risk from fraud. These include: address verification services, valid card number check, duplicate order check, spending patterns checks, frequency of card usage, and guards against automatic card generator programs. Some levels of fraud checking are configurable by the merchant, who also is able to block out specific IP addresses and credit card numbers through a simple, Web-based interface. In addition, all credit card information is always encrypted so that unauthorized usage is prevented.

PSiGate ESD

The PSiGate ESD module allows automatic electronic delivery of soft goods immediately after purchase, making purchased soft goods available to customers as downloads from an automatically generated Web page. Built-in mechanisms track the progress of the download to verify its success, then the link is automatically removed so that additional downloads from the same URL are disabled.

Merchant Reporting

The PSiGate solution provides a wealth of merchant reports that enable merchants to display transaction information, confirm shipment of goods, initiate post-authorizations and credits, add and delete entries in the fraud database, and manage the soft goods fulfillment system for their store-fronts. Because of the integrated components of PSiGate, these reports automatically reconcile orders placed through the storefront and those settled through the processor.

Using the PSiGate Reports and Tools

 *To find out more about any of the administrative options offered by PSiGate, refer to the documentation provided by PSiGate.*

Reports and Tools allows merchants to generate reports on Internet store activity from several different perspectives and to perform various administration tasks, including confirming shipments, issuing credits, and locking out fraudulent credit card users.

To view the reports, you will need an Internet connection with a forms capable browser. Once connected to the Internet, launch the browser and go to the Merchants Reports URL assigned to you by PSiGate. The URL will be in this form:

<https://reports.psigate.com/admin/yourstorename/reports>

You will be prompted to enter the user name and password assigned to you by PSiGate. If a user name or password was not assigned, please contact your Customer Care Representative or system administrator. After the user name and password have been successfully entered, the main menu of the Reports and Tools for your store, will display.

The main menu page displays a bar graph representing sales over the past twelve months, along with links to access reports and modules that may include:

View Orders

Allows you to view all successful orders by time period, by credit card number and time, or by order number. Selecting links from the Orders Received report lets you confirm shipments, credit orders, and block transactions from IP addresses or credit card numbers associated with selected orders, monitor the success of a specific ESD download, or send e-mail to customers.

View Transactions

Allows you to view all transactions (Sales, PreAuths, Credits, etc.) by time period, by credit card number and time, by order number, or by transaction type and time. In the Transactions Processed report, you can review Address Verification Service* (AVS) results or learn the reason a specific transaction was declined.

View Item Sales Statistics

Allows you to view sales statistics for all items or for one particular item within a specified time range.

Merchant Fraud Protection

Allows you to lock out the Internet Protocol (IP) address or credit card number of customers who have previously used a fraudulent credit card. You can also unlock IP addresses and credit card numbers from this section of the Reports and Tools. Also included in this chapter is information about fraud protection elements that can be configured outside the reports interface.

View Batches

Allows you to view when a batch was run, how much the batch totaled, and which transactions were included in the batch. Voids may also be performed from the View Batches section of reports.

Merchant Reports Administration

Allows you to delete old test transactions from the database, set a new time to run settlement (batch), and manually run batch.
